

VEE DUB MOTORS

11365 US Highway 60 W
Kevil KY 42053

Business Notes:

Our current operating hours are by appointment. Call the cell phone number (270-994-6261) and I can normally be on site within 10 minutes of your phone call. If I cannot take your call, please leave a message and I'll get back to you as soon as possible.

We offer service work by appointment. We can also provide advice and recommend where to take your car for service. Some repairs on VWs up to ten years old may still be under a special warranty and we can save you money by referring you to the VW dealer for a warranty repair.

We offer late model Volkswagens, but on a limited scale. If you have a particular model and year that you are looking for, we can find it for you at auction, perform needed repairs, and present you with a car that includes a limited 90-day warranty. Ask for more details on this program if interested.

Our selling method is no haggle pricing. All cars are priced at what we must get for them. There is no negotiation on these prices. If you don't like our price, there are plenty of dealers that will haggle. (Just make sure they know how to spell Volkswagen!) For most of our cars, regardless of miles, we now provide a limited warranty that is fully disclosed on a separate sheet. This three-month warranty is through ASC and is nationwide. There is no added cost for the warranty. Other warranties are available for an added charge. We take trades of any brand car. We now offer financing at 13.7% interest (APR) through DFWK. If you have good credit, you may qualify for a better APR at your credit union or bank, so give them a try first.

--Winborn (Windy) Gregory, owner
ASE Certified Master Technician

2001 Jetta GLS 2.0L, Automatic, Black VIN:3VWSS29M71M038714

- 2.0L AEG Engine
- AM/FM radio w/tape player (new)
- 6-disc CD changer in trunk
- Cruise Control
- Alloy wheels
- Air bags (dash, side)
- Power locks
- Antilock brakes
- Gray cloth seats
- Tinted windows
- Power moonroof
- Owner's manual in glove box.
- One master keys (folding with remote)
- Split folding rear seat
- New floor mats

Notes on car: Good starter car. Has a few dings and interior is not perfect, but very usable. Mechanically, this car is in good shape. Complete service performed on engine and transmission: new spark plugs, oil change, oil filter, transmission oil change and filter, new engine air filter and new cabin air filter. New windshield installed. A CV boot was replaced and new tie rod ends were installed. Four wheel alignment performed. Interior defects include a broken hinge on glove box lid (still functional) and a few small holes in seat cover material. Most everything is functional including working cup holders in dash, new radio, all window switches and door locks. A new door lock mechanism was installed on driver's door. There are a few items that I did not fix. The passenger side door latch is not providing a signal to the system to tell it that the door is open or closed. This could cause you to lock your key inside the car, but with precautions, you can live with this defect. (I'm trying to keep the cost down, but it can be replaced for an extra \$200.)

2008 Rabbit (Golf) 2.5L, 5-Sp Manual, Gray VIN:WVWAA71K28W062924

- 2.5L 5-cylinder Engine (good fuel economy/no timing belt)
- Aftermarket (Pioneer) AM/FM radio w/in-dash CD player, MP3
- Two-door
- Cruise Control
- 17" Alloy wheels/ new tires
- Air bags; Power locks
- Antilock brakes with Anti-Slip Regulation (ASR)
- Tinted windows
- Owner's manual in glove box.
- Working valet key plus working remote with key to program at dealer

Notes on car: Car was a local trade. Has a Tennessee title. Car was given a complete service, including new air filter, cabin air filter, and spark plugs. Air conditioner was weak. A new compressor was installed to correct this. Four new tires were installed. There were known issues that were not corrected. 1) The windshield washer tank leaks when filled to brim. This can be easily patched during a future service that requires removal of front bumper cover. 2) The tie rod end boots are cracked. The function has not been affected. This repair can wait until some other front end work is required in future. Car runs great. This would make a great travel car to pull behind a camper. If you like a real manual transmission, it would be great for anyone as a daily driver.

2007 EOS (Hard Top Convertible) 2.0L Gas Turbo, 6-Sp Mnl, Black VIN:WVWAA71F67V014222

- 2.0L Turbo Engine (~31 mpg, highway)
- AM/FM radio w/in-dash CD player, MP3
- Two-door coop
- Cruise Control
- Alloy wheels
- Air bags
- Power locks
- Antilock brakes with Anti-Slip Regulation (ASR)
- Tinted windows
- Top has moonroof mode and full folding convertible (into trunk) ...and it works!
- Owner's manual in glove box.
- One master keys with remote

Notes on car: This car was traded locally at Linwood. We purchased this at the local auction. Contacted previous owner and no problems were noted other than some warning lights related to the ASR system. Previous owner trades cars about once a year and has bought from me in the past! ASR warning lights were cleared by properly coding the control module. A new front grill was installed to replace a broken grill and missing chrome trim. A new matching tire was replaced on the front to replace a worn tire and improve handling. Car will need a timing belt at 120,000 miles. Car checks out great! It is my all-time favorite!!! I put 2500 miles on it, but decided to keep it under the 100,000 mile marker and reluctantly put it up for sale.

2006 Jetta TDI, 1.9L Diesel, 6-Sp DSG Automatic, Blue VIN: 3VWST71K66M717644

- 1.9L 4-Cylinder Diesel Engine (~43 mpg, highway)
- AM/FM radio w/in-dash 6-disc CD changer, MP3
- Cruise Control
- 17" alloy wheels
- Moonroof
- Air bags (dash, side, and side curtain)
- Power locks
- Antilock brakes with Electronic Stability Program (ESP) system
- Leather or Leatherette seats, gray
- Tinted windows, aftermarket dark tint
- One master key (folding with remote) and one valet key
- Split folding rear seat

Notes on car: This car was purchased from a dealer in Oklahoma and was "front-line" ready, as they call it. We spent over \$1300 in parts alone to really get it ready. The timing belt, tensioner, and water pump were replaced. New rear brakes installed. DSG transmission was serviced with new fluid and filter. Oil and oil filter were changed. Engine air filter and cabin air filter were replaced. New wiper blades. Both driver door and passenger door latches were replaced with new mechanisms. Now the car is ready. We have been using this car for any trips that we take and have added over 20,000 trouble-free, economical miles.

2000 New Beetle 2.0L, 4-Sp Automatic, Blue/Purple VIN:3VWCC21C2YM437190

- 2.0L 4-cylinder Engine (AEG)
- Aftermarket AM/FM radio w/CD player
- Leather seats, tan
- Tinted windows; Cruise Control; Alloy wheels; Antilock brakes
- Air bags (dash, side); Power locks; Rear Spoiler; Decorative tail light covers
- One master key (folding with remote)

Notes on car: This car has a Tennessee title and was purchased at the local auto auction at a reasonable price. It is a good example of the amount of work that has to be done to bring a used Beetle up to a retail car-lot standard. You might say, it got the works: new tires, control arm bushings, both CV axels, both tie-rod ends, four wheel alignment, new valve cover gasket, filters, and the list goes on. The final result was good. The car runs great and is ready for many more miles of reliable service. A few items were not repaired in order to hold the price down. They include the glove box latch (will open), visor mirror light, tear in passenger leather seat, passenger security feature on door latch. All can be repaired at a later time if so desired. Otherwise, this car is in great condition. **(Note: Windshield will be replaced prior to sale.)**

2006 Passat 3.4L, VR6, Automatic, Gray, VIN: WVWEU73C96P150049

- 3.4L VR6 Engine - six cylinder
- Moonroof
- Alloy Wheels
- Black Leather Interior
- AM/FM CD player, SAT
- Anti Lock Brakes
- Fog Lights
- 2 keys

Car is a local trade from Sikeston MO. Fuel economy is amazing for a 6-cylinder: around 30 mpg. Runs great. Has a few exterior blemishes -- nothing major. Everything checks out fine and car runs great.

2005 New Beetle 2.0L, 6-Sp Automatic, Yellow VIN:3VWCK31C05M412583

- 2.0L 4-cylinder Engine (BEV)
- AM/FM radio
- Black leather seats, heated
- Tinted windows; Cruise Control;
- Alloy wheels; Antilock brakes
- Air bags (dash, side); Power locks, sunroof
- One flip key with remote

Notes on car: I purchased this car at the local auction, knowing that it had many problems, but also realizing that the interior is very clean for the age and miles on the car. The car has the original floor mats which are in excellent condition. The following problems were corrected: new valve body in transmission, new catalytic converter, new driver's side door latch, new tie rod ends, new 3rd brake light. The alternator, fuse box on battery, and radiator fans were replaced. The only issues not corrected are the rear window defogger (1/2 of window defogs), and the radio which draws a current, pulling down the battery, and CD player does not work. (\$100 has been deducted from the price of the car for this issue. We can install a used official VW radio for \$100 additional. Aftermarket radios are available for this car.

1999 New Beetle 2.0L, 4-Sp Automatic, White, VIN:3VWCC21C5XM460591

- 2.0L 4-cylinder Engine (AEG)
- AM/FM radio w/CD player in trunk
- Leather seats, gray, heated
- Tinted windows; Cruise Control; Alloy wheels; Antilock brakes
- Air bags (dash, side); Power locks
- One master key (folding with remote)

Notes on car: This car has a Tennessee title and was purchased at the local auto auction at a reasonable price. The air conditioning system was completely redone. A new compressor, evaporator, and condenser were installed. While the ventilation box was out, a new heater core was included. The infamous foam in the air ducts was corrected using HVAC foil tape on the air flaps. Car has been extensively tested and is ready for a new home.

2002 New Beetle 1.9L TDI, 4-Sp Automatic, Green, VIN:3VWCP21C62M425202

- 1.9L 4-cylinder Diesel Turbocharged Engine (ALH)
- AM/FM radio w/CD player in trunk
- Cloth seats, tan, heated
- Tinted windows; Cruise Control; Alloy wheels; Antilock brakes
- Air bags (dash, side); Power locks
- One master key (folding with remote)

Notes on car: I sold this car once before to a very loyal customer. After several years and over 40,000 miles, it came back with a possible transmission problem. I took the car as a trade on another TDI on my lot. Subsequently, I determined the transmission to be bad and finally located a used replacement. (These transmissions rarely fail.). In short the car is now ready for sale after considerable test driving.

SPECIAL NOTE:

All VWs come with the **Vee Dub Advantage** which includes free readouts of DTCs if the check engine light should come on. We will give you advice regarding repair. Although some of our cars may be under full factory warranty, some repairs are very simple and we may be able to save you a trip to the dealer for warranty service.

Notes on Warranty...

We provide a 90 day/3000 mile warranty with certain limitations. The ACS warranty reimbursement is capped at \$1,000.. This warranty is provided at no additional cost. For details, ask for a written warranty policy, which is available at any time and will be provided with the sale contract. Any exceptions to the warranty will be noted on the contract. We service and test all our cars, but they are mechanical and we cannot always predict a failure, but we do our best to offer a product that will be trouble free.

1999 Cabrio (Convertible), Blue, VIN: 3VWDB61E8XM815916

- 2.0 L Engine (ABA)
- 4-Speed Automatic
- Leather Seats (Gray); AM/FM/CD
- Master key - only one key
- Dark tinted windows
- Alloy wheels

This car has a few cosmetic defects and the price is adjusted to reflect that. Mechanically, the car is in great shape. Two new tires were installed. The engine was serviced to include new air filter. A new air conditioner compressor was installed. Everything seems to be working with the exception of the cruise control and the hydraulic assist on the convertible top. The top has been made to operate manually and it is not that difficult to open and close the top. Both front and rear brake pads and rotors are almost new. A new CV axel was installed on the right side.

2003 New Beetle 2.0L, 4-Sp Automatic, Convertible Blue/Purple VIN:3VWCK21Y63M308182

- 2.0L 4-cylinder Engine (BDC)
- Aftermarket AM/FM radio w/CD player
- Leatherette seats, tan
- Tinted windows; Cruise Control; Alloy wheels; Antilock brakes
- Air bags (dash, side); Power locks
- One master key (folding with remote)

Notes on car: This car has a Kentucky title and was purchased at the local auto auction at a reasonable price. It is another example of the amount of work that has to be done to bring a used Beetle up to a retail car-lot standard: two new tires, both CV axels, four wheel alignment, filters, new catalytic converter, new passenger door latch, rebuilt transmission valve body, and the list goes on. The final result was good. The car runs great and is ready for many more miles of reliable service. Repairs came to \$2000 for parts alone, but in some respects, it is like a new car or at least a car with much lower miles. Car was repainted due to peeling clearcoat.

2015 Passat 1.8L Gas Turbo, 6-Sp Automatic, Night Blue VIN:1VWAS7A38FC056577

- 1.8L Turbo Engine (~36 mpg, highway)
- AM/FM radio w/in-dash CD player, MP3, other hookups, bluetooth
- Cruise Control
- Air bags
- Cloth seats, black
- Power locks
- Antilock brakes (ABS)
- Tinted windows
- Owner's manual in glove box.
- Two master keys with remote

Notes on car: This was a company car at the Chattanooga assembly plant. It was offered at the Atlanta Auction as a Prequalified car to sell as a certified pre-owned VW (at a VW dealer). This means the car is made showroom ready. All scratches and dings are corrected, new tires and brakes are installed, the oil is changed. This car is immaculate and is ready for a first owner. We drove it from Atlanta on just over a half tank of gas. Amazing fuel economy! If you are wanting a perfect car, this one is it. Since writing this blurb, time has passed and this car has not sold. (All sales have been slow.) Since we did not want to waste the full warranty, my wife has been driving this car and we use it on trips. I think we have put more than 40,000 miles on it. My opinion of the quality and reliability of this VW continues to increase. It is one great car! We have kept up with the normal maintenance/oil change. Of course, the price was lowered to reflect this use.

2012 Tiguan 2.0L Gas Turbo, 6-Sp Automatic, Night Blue VIN:WVGAV7AX4CW523724

- 2.0L Turbo Engine, Direct Injection
- AM/FM radio w/in-dash CD player, MP3, other hookups
- Alloy wheels
- Cruise Control
- Air bags
- Cloth seats, black
- Power locks
- Antilock brakes (ABS)
- Tinted windows
- One master key with remote

Notes on car: Car had issues when purchased. These were resolved by replacing a fuel module at the gas tank. Car now runs perfect and there are no know issues. Complete service was performed, except for oil change which will be done when purchase contract is signed. Car is very clean inside and out. Car will need new tires in 10 to 20,000 miles.

Vee Dub Motors is a used car dealer in the Paducah, KY area. We are near Interstate 24 between Nashville and St. Louis. Our informational web site is at <http://www.VWupdate.com>. We offer the same cars as many of the big city dealers, but with a big difference. We actually service each car before the sale. When we buy a car at auction, we take it to our shop and do a wheels off inspection. We then repair anything that needs correction. We also perform any needed maintenance service. Some of our competitors tell you up front that they do nothing to the cars and that you can expect to spend \$500 getting it truly ready. We have already done this and in most cases, do not charge any more than the competition. We take trades, and offer financing through DFWK. Please call if you have any questions or wish to arrange for transportation assistance. We will assist you in any way that we can (airport or bus station pickup, for example).
